re: Reclamation work at Limelight Quarry

Greetings,

Per our conversation this morning this is to confirm that we have completed all of the work required to bring our operation under 5 acres of disturbed area. We will continue to reclaim as we work so that there will be little to do at the end of our operation. On Monday October 9th we seeded and ripped all of the areas as required. I believe that we now have the best example of a building stone quarry reclamation program in the state of Utah.

I appreciate your help in enabling us to accomplish this objective.

Sincerely,

Gary Mullard
President

da

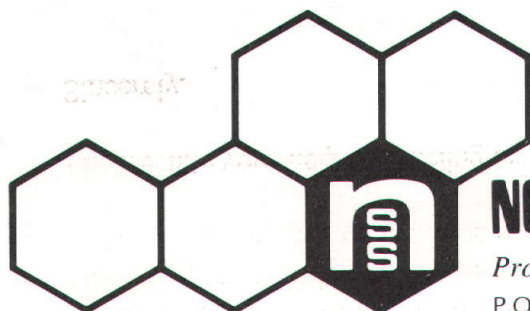

P.S. Please advise on the map request in the letter from Mr. Blake. Since you did not get your copy of that letter, I am enclosing one for you.
